

# THE SEVEN CONTINENT

## Abstract

As the slogan states **Exploring the world of art through NFTs**. ArtMemoir tends to explore the 7 continents of the world and its indigenous cultures and tribes through artworks minted on the blockchain. These NFTs will be used as medium of transactions, stakes, game fi access cards, shares and lots more. Here art won't just be used only for beatifications and preserving the cultural heritage of the people or the art they represent but will also be used in real time situations without being controlled by a centralized organization or a third party, this will be achieved through the use of **Blockchain**.

However, **ArtMemoir** will be releasing a series of NFTs called **THE SEVEN CONTINENT**. This series will be featuring the 7 continents, 5 pieces in each continent representing the 5 poles in a continent ( East, West, South, North and Central Pole) Pointing out not just the beauty and identities of the people, culture and tribes that represent but will break the limitation of Art as a whole.

## THE SEVEN CONTINENT

This series of NFT will portray and identify great cultures and tribes of the world and bring together the fusion of these cultures in one different piece separated according to their continent, Cultures, tribes with a unique identification made with notable and striving artists in our various environments. The holders of these NFTs will be able to access and enjoy all benefits and utilities of ArtMemoir and will be able to use them as a medium of transaction with our various partners on gamefi, real estate, own shares, stake and earn, art and lots more put together as a whole package with the help of the blockchain.

However, Due to the demand of these rare NFTs by the public as the world is moving towards the part of decentralization completely the value of these artworks will be increased based on the utilities allocated to it and the services of partnered projects.

The Team ArtMemoir will be releasing these Series continent by continent allocating several real time use cases as time goes on.

Watch out for the **AFRICAN CONTINENT** 🙌🕶️
